Subject: RE: PSNS sewage discharge

I do know about the other spills. We don't move fast here, but I am working with them on these issues.

Thanks

Thanks Jeff. I appreciate your rapid response.
Rob - please let me know if you need any Ecology support.
I believe PSNS has had at least a few of these in the last year.

Hi Jeff - Is there someone on your team who is working on PSNS issues?

Rachel

This appears to be EPA jurisdiction. We do have a pretreatment permit but this is a direct discharge.

One media outlet has contacted me, and I've touched base with EPA's media shop. I'd like to confirm whether this would be under Ecology or EPA jurisdiction. An ERTS reports appears to be been submitted this morning, #687641. That report states that the Navy has told us that the release began on March 2, and was stopped on March 3. The reporting to NRC and us appears to have taken place this morning at 0922 and 0924 respectively. It appears that the Navy is reporting a 4,000 gallon discharge.

Please let me know if this involves our NPDES with Bremerton or if this is under EPA. Thankyou!

Subject: No-contact advisory issued for Sinclair Inlet due to sewage spill at Puget Sound Naval Shipyard

March 5, 2019

No-contact advisory issued for Sinclair Inlet due to sewage spill at Puget Sound Naval Shipyard

Seven-day no-contact advisory in effect through Sunday, March 10.

Affected area: Sinclair Inlet and the head of Port Washington Narrows up to Lions Park

Advisory: No-contact advisory

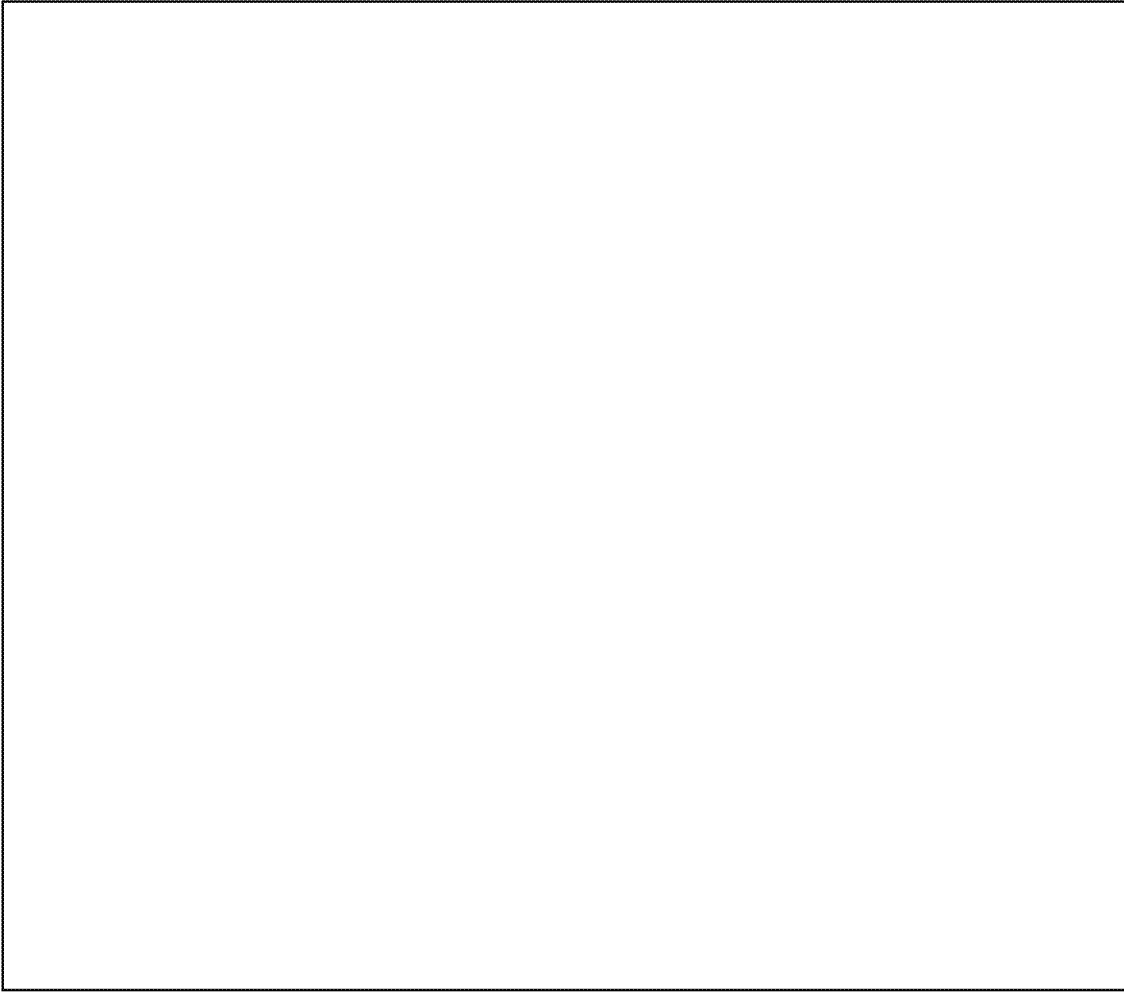

During a no-contact advisory, the public is advised to avoid contact with the water in the affected area. This means the District recommends against swimming, wading, or types of water recreation where water could be swallowed or get in the mouth, nose or eyes. People should also avoid direct skin contact if possible, and immediately wash with soap and water if they have exposure to the water. Signs have been posted at locations around Sinclair Inlet and the head of Port Washington Narrows, up to Lions Park.

This area is already permanently closed to shellfish harvest due to pollution.

The advisory is in effect through Sunday, March 10, 2019.

For more information, visit www.kitsappublichealth.org/beaches.

Impacted shoreline/beaches highlighted below.

Approximate location of sewage spill noted with bullseye.

Source of pollution: Sewage spill reported by Puget Sound Naval Shipyard.

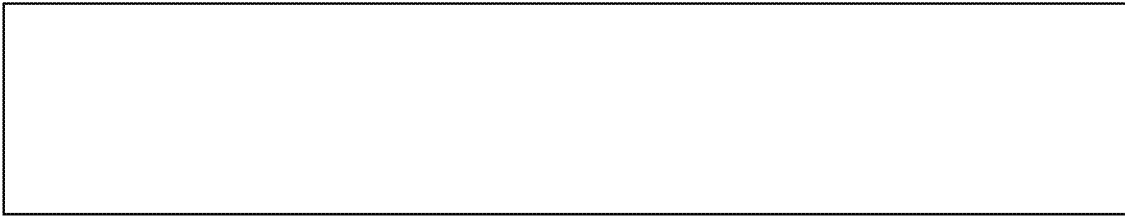

Spill volume: 4,000 gallons

Date of incident: Saturday, March 2, 2019 - Sunday, March 3, 2019

Contact: Puget Sound Naval Shipyard – Intermediate Maintenance Facility Public Affairs Office,
(360) 476-7111
